Election/Restrictions

1 Restriction to one of the following inventions is required under 35 U.S.C. 121:

I Claims 31-34, 61 and 62, drawn to an optical disc medium recording and reproducing apparatus, classified in class 369, subclass 30.1.

II Claims 35-56, 63-71, drawn to an optical disc master board, classified in class 369, subclass 47.36.

The inventions are distinct, each from the other because of the following reasons:

2 Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions they are disclosed ^{as} different species and they have different modes of operation, different functions, or different effects.

3 Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5 Applicant is reminded that upon the cancellation of claims to non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and the fee required under 37 CFR 1.17(i).
